Allowable Subject Matter

1. Claims 1 - 9 are allowed.

The following is an examiner's statement of reasons for allowance:

The instant application claims "the protrusion portions have substantially the same height". These limitations are not obvious over the prior art. Yamada discloses undulations (protrusions) on the surface of honeycomb segments joined together to form a honeycomb structure. However, Yamada is silent in regard to the undulations having substantially the same height. It would not be reasonable to believe the undulations taught by Yamada are inherently the same height because Yamada does not teach a set height to be a necessity. In fact, Yamada's examples teach undulations of differing height. Therefore, based on the nearest prior art, one would not expect to form a honeycomb structure comprising honeycomb segments joined by honeycomb segments of substantially the same height, embedded in an adhesive layer, without contacting the surface of the opposing honeycomb segment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
